

Eolia

GIUSFREDI

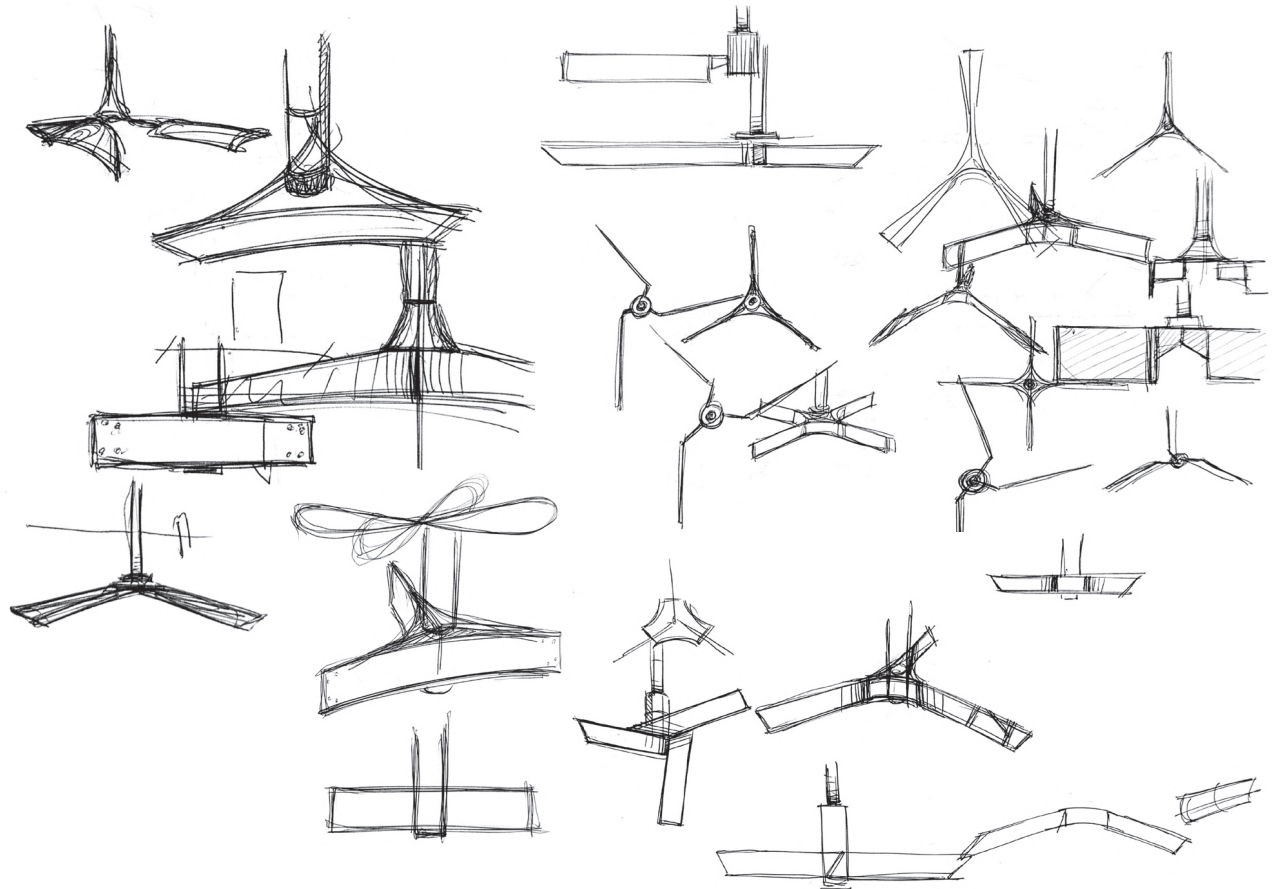

FIorentino

Eolia is a ceiling fan with three blades that takes its name from the mythical island of the same name, home of the god of the wind Aeolus. The shape, as well as the aluminum with which it is made, looks to the brutalist style making the structure physically and visually light. The 45-degree tilted end blades help to maximize performance and improve efficiency. The purpose of this bold design is to provide people with a ceiling fan that can act as a sculpture to contemplate and converse around.

We designed the Eolia ceiling fan in two different versions: with and without a pendant in order to make it adaptable to any ceiling regardless of height.

Eolia est un ventilateur de plafond à trois pales qui tire son nom de l'île mythique du même nom, demeure du dieu du vent Éole. La forme, ainsi que l'aluminium avec lequel il est fabriqué, s'inspirent du style brutaliste, rendant la structure légère physiquement et visuellement. Les pales inclinées à 45 degrés aident à maximiser les performances et à améliorer l'efficacité.

Nous avons conçu le ventilateur de plafond Eolia en deux versions différentes : avec et sans suspension afin de le rendre adaptable à n'importe quel plafond, quelle que soit sa hauteur.
